Dear User,

Herewith we present the results of the RapidStat Hematology survey for:

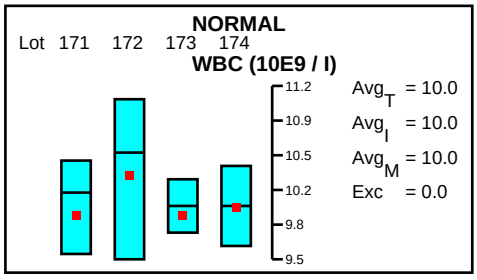
Product	:	8 Parameter Control
Lotnumber	:	180
Expiry date	:	2005-07-19
Instrument	:	Medonic

In the following pages you will find all relevant details. On this page an explanation of the main subjects of the report is given.

Cumulative:

Shows the results of the latest 4 lotnumbers, per parameter and per level.

Example:

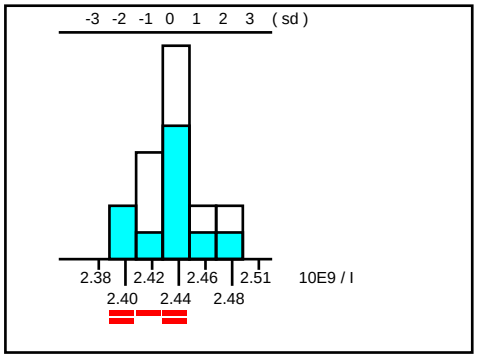


AvgT = Average value of the total group of users
AvgI = Average value of Your instrument group
AvgM = Average value of Your results
Exc = Excentricity
= Your result
= Instrument group
= Total group of users

Parameter review:

Shows graphically per parameter the results of the total group, the instrument groups and your results. These are the results of the current lotnumber.

Example:



= Your result
= Instrument group
= Total group of users

Also a table is listed which shows: Average, Standard Deviation, Variation coefficient, Number of measurements and Number of statistical errors. The figures are listed for Your Results and all Instrument groups.

Excentricity graph: this plot presents the confidence interval for the total group of users, your instrument group and the average value of your results. Colour coding is similar to the parameter review.

In case anything in this report is not meeting your expectations, please inform us at **RapidStat@emea.tycohealthcare.com**.
